Date of Submission: October 11, 2026

1. **University Library; Location: 2nd Floor West Building**

Overview and Primary Purpose

The University Library is a place where students can find books, research materials, and other learning resources. It helps students with their studies by giving them access to physical books, online resources, and a quiet place to study. It also helps students who need information for their assignments, projects, and research.

Services and Student Access

Services Offered to Students

Book Borrowing and Renewal: Students can borrow books and other learning materials that can help them with their subjects and assignments.

Online Resources and Databases: Students can access electronic books, journals, and other online resources for their research and studies.

Study Areas: The library provides quiet study areas for students who want to focus, as well as collaborative spaces for group activities and discussions. There is also a space for online meetings inside capsules.

Research Assistance: Students can ask librarians for help in finding reliable sources and other materials needed for their academic work.

How Students Can Avail of the Services

Physical Resources: Students can tap in their Mapúa University ID when entering the library, borrowing books, or using its services.

Digital Resources: Students can access online library resources through the university's library systems using their student credentials. Some resources are also available remotely through the library's online access services.

Important Information

Office Hours: Monday to Saturday, 7:00 AM to 6:00 PM.

Requirements: Mapúa University ID

Key Policies: Students must follow library rules, maintain silence in quiet study areas, and return borrowed books on time. Overdue fines may apply to late returns.

Personal Reflection

As an AI Engineering student at Mapúa University, I know that studying is not just about attending classes and listening to lectures. There are times when I need to do extra research, read more about a topic, or practice solving problems that I find difficult. The library can help me with these things by providing learning materials and a quiet place where I can focus. It can also be useful when preparing for exams and completing assignments. Since my course is related to artificial intelligence and technology, having access to online research materials is important for learning more about topics beyond what is discussed in class. Overall, I believe that the Mapúa University Library is a useful facility that can help me improve my studies and become a better student.

2. **University Gymnasium**; **Location: Ground Floor, Center of Campus**

Overview and Primary Purpose

The University Gymnasium is a facility used mainly for sports activities, athletic training, and Physical Education classes. It provides a space for students to participate in sports and complete their scheduled PathFit activities. It is also used by the university's student athletes for their training and preparation for competitions.

Services Offered to Students

Indoor Sports Activities: The gymnasium provides a space for sports such as basketball, volleyball, and other indoor sports, depending on the scheduled activities.

Physical Education and PathFit Classes: Students enrolled in PathFit subjects can use the gymnasium for their scheduled classes and physical activities.

Athletic Training: Student athletes can use the facility for their scheduled training sessions and preparation for university sports competitions.

University Sports Activities: The gymnasium can be used for approved sports events, practices, and other university activities.

How Students Can Avail of the Services

PathFit Students: Students enrolled in a PathFit subject can use the gymnasium during their scheduled classes and follow the instructions given by their instructor.

Student Athletes: Students who are members of university athletic teams can use the gymnasium during their assigned training schedules.

Important Information

Operating Hours: Access depends on the schedule of PathFit classes, athletic training, and other approved activities.

Requirements: No additional requirements are needed to attend scheduled PathFit classes. Students should follow their instructor's instructions.

Key Policies: Students must wear their designated PE or PathFit uniform during their scheduled classes. Non-athlete students who are not enrolled

in a PathFit subject are not allowed to use the gymnasium. Access is limited to scheduled classes, student athletes, and other authorized activities.

Personal Reflection

As a Mapúa University student, I think the gymnasium is an important facility because it gives students a place to participate in sports and physical activities. It is also useful for students taking PathFit subjects because they can practice different sports as part of their classes. However, not all students can use the facility whenever they want since access depends on their classes or participation in university athletics. For me, having a sports facility inside the campus is important because it encourages students to stay active while balancing their academic responsibilities.
